

Workday Script

Millicent Wilgenbusch

Positives about **Workday Student**:

1. Being able to use Workday on my phone, not just my computer, is an exciting feature that will enhance my life as a student.
2. Learning to use Workday Student will be much easier than learning AccessPlus. Workday will make orientation easier for incoming students because they can focus less on onboarding tasks and more on the excitement of starting their adventure at Iowa State.
3. Finding your advisor's contact information and setting up meetings will go much smoother. Resources are most helpful when you can reach them easily.
4. Getting rid of jargon will help me find the tools and items I need as a student faster.
5. Having messages and action items sent directly to my inbox in Workday Student will help me know what I'm supposed to do and when.

Positives about **Registration Experience**:

1. With Workday Student, you can register for classes directly from a saved schedule made ahead of time in the app.
2. No more bouncing back and forth from your 4-year plan in Excel to AccessPlus; you can now create, save and register from your graduation plan right in Workday. This feature will help you know you're on track to graduate.
3. If you try to register for a class for which you haven't met a pre-req, Workday Student will stop the process, notify you immediately and help you request an override if necessary.
4. You can search for offered courses and all their details directly in Workday Student.
5. Learning to register for classes as an incoming student will be easier than we've seen in the past. Workday Student will be easier to learn because it is a modernized system. It also allows students to easily contact their advisors for help along the way.
